

# Hashir Lawal

Software developer | 🇳🇮 Nigeria | [enipx.com](https://enipx.com)

As a software engineer with a curious mindset, I've contributed significantly to the development of multiple products, taking them from concept to implementation. Currently, I work mostly with **React Native**, **React**, **TypeScript**, **Node.js**, and **GraphQL** with a track record of over 5 years in remote work, collaborating with companies globally.

I'm highly motivated especially when it comes to solving problems. It's like a puzzle to me, and finding the right pieces is my kind of adventure.

## Experience

### [Abacus \(microtraction\)](#) [↗](#)

2022 - present

Co-founder & Lead Front-end engineer

I lead the FE team and help set the product design direction. Played a key role in developing the initial mobile app version & getting it on the Google Play and Apple App Store within 6 weeks. Additionally, we secured over \$120k in pre-seed funding

### [Inverse](#) [↗](#)

2023 - present

Co-founder & Lead Front-end engineer

I'm leading the FE team to create a web3 solution that makes creation & distribution of digital collectibles super easy. It's all about simplifying processes in the Web3 space.

### [Helicarrier \(YC18\)](#) [↗](#)

2020 - 2022

Front-end engineer

I conduct user research, experiment with new features, and implement them. I also collaborate closely with support to assist users in resolving issues.

### [Optimists](#) [↗](#)

2019 - 2020

Lead Front-end engineer

I was responsible for building the MVP version of the product. I also collaborated closely with the product manager to refine approaches based on user feedback, ensuring continuous improvement and alignment with user needs.

### [Freelancer](#) [↗](#)

2018 - 2019

Web developer and Brand designer

As a freelancer, I wore two hats - I create develop software and also design brands. I use my skills to make software work well and make brands look great.
